AGENDA ITEM	DISCUSSION/CONCLUSIONS	RECOMMENDATION/ACTIONS WHAT/WHEN	WHO	STATUS REVIEW
Saf -T Blood Culture Device	Committee was informed that training for the Saf-T Blood Culture Device will take place on April 23-April 29 and a calendar was available for times and dates for this training.		M. Santanna	Closed
Corlock-Corport Y Adaptar Repair Kit	K. Davis requested a Corpak Y Adapter repairs kit to be stocked and available for inpatient and outpatient areas to avoid opening a complete kit when a repair is needed. Vacutainer due to new blood bank instrument.	Committee recommended kit to be stocked for both areas.	K. Davis E. Hardee	Closed
New Blood Bank Instrument	N. Reilly requested a new blood bank instrument because the blood bank requires a larger specimen volume. Vacationers need to change to accommodate new laboratory equipment. The pink tube can be easily identified as blood bank specimen.	Product will be converted to accommodate new recommended laboratory equipment.	N. Reilly	Closed
Silicone Enternal Feeding Tube	K. Jorgensen requested a Silicone Enternal Feeding Tube system to avoid improper connection of feeding tubes. The product should decrease opportunity for mistakes made when connecting tubing.	Committee recommended to bring feedingtube in by Central Supply.	K.Jorgensen	Open
Silent Night Pill Crusher	J. Byrnes requested pouches used with the Silent Night Pill Crushing System to be stocked in Central Supply.	Product declined at this time due to unit specific request, cost and instrumentation required at \$100.00 each. Should have been presented prior to purchasing instrumentation. Need nurse managers approval prior to bringing into system. Will look into alternate vendor.	J. Byrne	Closed

Huber Needles	S. Ribble requested to return to the Tacy Medical safety huber needle verses current Deltec Gripper Plus.	Committee recommended further evaluations on current products in hospital and other available huber needles. Subcommittee will meet to discuss.	J. Ribble	Open
